2018/2019 Season

Dear Mare Owner,

Thank you for your enquiry about breeding your mare this season. At Adelaide Plains Equine Clinic, we offer a wide range of equine reproduction services including chilled and frozen semen artificial insemination, as well as stallion collection and shipment of chilled semen.

It is best to bring your mare to the clinic on the first day you first notice her in season. If you prefer to induce oestrus in your mare, we recommend giving her an injection of prostaglandin (dispensed through the veterinary clinic) on a Thursday and then evaluating her either Sunday night or Monday morning, depending on the days the stallion will be collected.

Once she is detected in oestrus, she will be scanned every other day until a breedable follicle is detected. We will then order semen and she will be given deslorelin to induce ovulation. The semen is then collected at the airport or post office and ensured that it arrives at the clinic in the best possible condition. It is preferable (and cheaper!) if the mare owner delivers the semen to the clinic. If that is not possible, we can arrange pick up, at your own cost.

2018/2019 Artificial Insemination Prices

Chilled Semen: Fixed price for chilled semen AI \$400, including 16 day pregnancy scan if performed at the clinic. Excludes drugs & agistment.

Frozen Semen: Fixed price for frozen semen AI \$700, including 16 day pregnancy scan if performed at the clinic. Excludes drugs & agistment.

20% off fixed price fee for each additional cycle (possible exclusion for known problem mares).

After the 16 day pregnancy scan is positive, we recommend you book your mare in for a 45 day pregnancy scan to ensure the pregnancy is healthy and has been maintained. The Cost is \$85 if performed at the clinic.

*Please note: **ALL FEES ARE TO BE PAID IN FULL WHEN THE MARE IS PICKED UP.**

APEC Agistment:

\$45/day – mare & foal

\$40/day – single yard

Note: Your mare may require additional diagnostic techniques such as a uterine swab, biopsy, or flush prior to insemination. The cost of consumables, drug and laboratory fees are additional costs and will be added to the account.

After you choose a stallion for your mare, please give us a call so that we can book in your mare. We can then determine the best possible plan in order to get your mare in foal this season.

(Note: if the combined age of the mare and stallion are above 25, there is a lesser chance of breeding success. For older mares, it is advised to choose a younger stallion.)

Please Note: A copy of Horse Registration Certificates &/or Microchip Numbers **MUST** be provided for identification purposes prior to all breeding services.
